SCHEMATIC DIAGRAM of ECM viewer

HIGHLIGHTS

YOUR ADVANTAGES AT A GLANCE

- Display of documents in the ECM viewer through direct access to the SAP ERP system
- Additional display of index data, layers, annotations and stamps
- Support of more display formats than in SAP GUI (mime types)
- Direct processing of the document in the ECM system is possible

TECHNICAL DETAILS

- The Web client can be called via https or http
- Customizing is integrated into the SAP transport system
- Delivery in the /VBGMBH/ namespace per transport order

REQUIREMENTS

- SAP ERP ECC 6.0 EHP 2 or later
- Compatible with the following ECM systems:
 - DocuWare
 - enaio

SCREENSHOT of ECM viewer

The left screenshot shows the SAP 'Display Invoice Document' interface for document 5105600921. It includes tabs for Basic Data, Payment, Details, Tax, Contacts, and Note. An 'Attachment list' dialog box is open, showing a table of attachments:

Icon	Title	Creator Name	Created On
	Incoming invoice log, invoice verific.		02.05.2016

The right screenshot shows the DocuWare web client displaying the same invoice. It features a header for 'Stahlwerk München', a barcode, and a table of items:

Art.No.	Article description	Quantity	Amount	
S01	Steel beam a215m5d500x200, 5 metre	100	34.400,00	
			Total net	34.400,00
			19% VAT	6.536,00
			Total amount	40.936,00

Below the table, it states: 'Payable within 14 days less 2% discount, 30 days net'. On the right side, there is a metadata panel for 'Editing index entries of "Invoice"':

- SAP-ARCHIV_ID: D4
- SAP-ARC_DOC_ID: 05DDC0A0F8E04D518AA3B275570
- Barcode: 10011
- Barcode sent to R3: X
- Partnernumber: 300000
- Date: 02.04.2016
- Company: Stahlwerk München
- City: [empty]
- Documenttype: Invoice

PRODUCT SERVICES

We help you achieve better integration of your documents and archive system in your everyday work. The following services are offered:

- Analysis of your requirements
- Configuration and implementation of the systems involved
- IT and user training workshops
- Maintenance and support
