

Varelmann VAT ID Check in DocuWare

Section 14 of the German Value Added Tax Act requires that audits include a verification of the invoicing party's identity.

The [Varelmann VAT ID Check in DocuWare](#) simplifies the process by performing this task automatically.

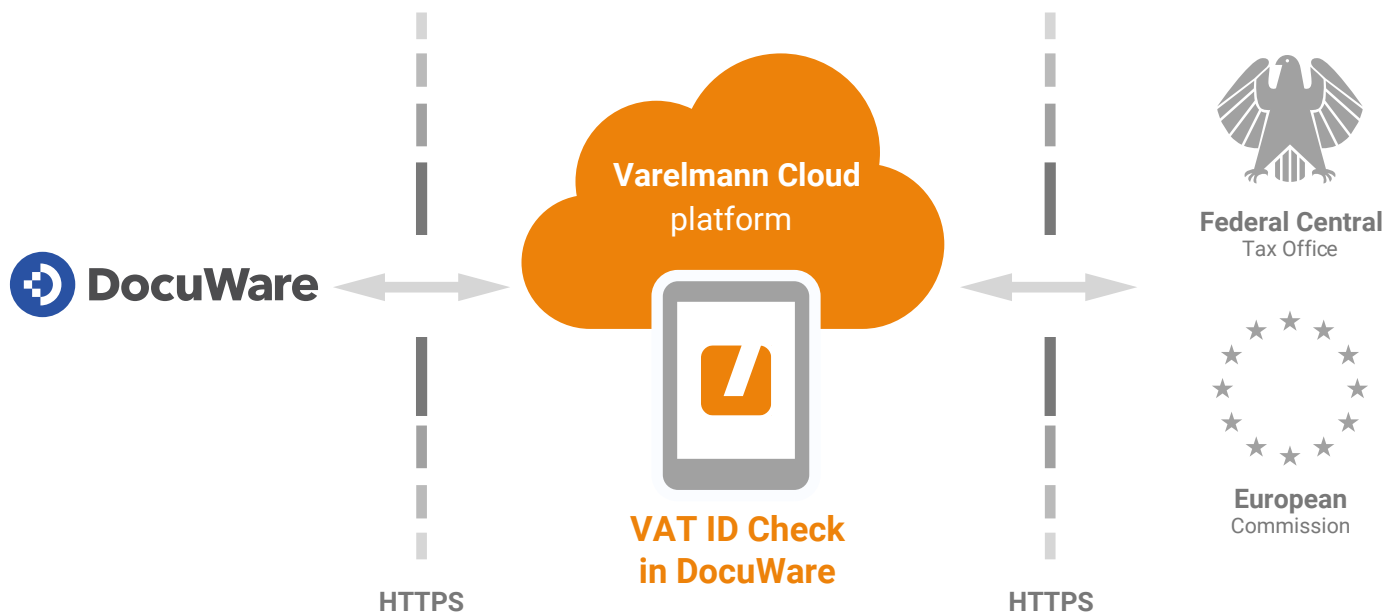

Mandatory verification of invoicing party data under Section 14 of the VAT legislation

The audit under Section 14 of the German VAT legislation requires a verification of the invoicing party's identity, including their address and VAT ID number. To simplify this verification process, Varelmann offers a service that can automatically check data from DocuWare against the database of the German Federal Central Tax Office and the European Union's VAT Information Exchange System (VIES).

Our fully integrated automatic verification feature protects you against negative tax effects.

AUTHORIZED PARTNER

The automated, qualified validation of the VAT ID saves you time and increases the quality of the validation under Section 14. It accelerates invoice processing and minimises audit errors.

VAT ID Check in DocuWare

The Varelmann VAT ID Check in DocuWare integrates the required qualified verification of trading partners directly in the DocuWare ECM system as a standardised REST web service function. For relevant business processes, the required parameters are automatically determined and applied in the verification. The results of the verification are conveniently saved in the index data of the invoice documents and can be accessed there at any time.

The standardised application and our extensive experience ensure rapid full implementation of the Varelmann VAT ID Check in DocuWare.
